

## IT Infrastructure Architect – Corporate

The City of Austin seeks an experienced, progressive, and innovative leader to serve in an executive level role to fill the IT Infrastructure Architect – Corporate position. The ideal candidate will provide oversight of the analysis of current City systems, IT functions, IT support, applicability, compatibility and recovery, identifying requirements and assumptions. This position will lead the City-wide organization of IT strategy and infrastructure, the introduction of technology, and the modeling of system support. The candidate will have strong communication, analytical, leadership, problem-solving and negotiation skills. They will also have the ability to maintain high ethical standards in difficult situations.

**Minimum Qualifications:** Graduation from an accredited four-year college or university with major course work in a field related to information science/computer plus six (6) years experience in IT strategy planning and infrastructure support with four (4) years management experience. A Masters Degree in Information Systems may substitute for two (2) years of the required experience.

**Compensation and Benefits:** The City of Austin offers a competitive salary that is negotiable depending on qualifications, experience, and an excellent benefits and retirement package.

**How to Apply:** Interested candidates may apply on-line with the City of Austin at [www.austincityjobs.org](http://www.austincityjobs.org) requisition # 067025.
