

Do you believe your state has an innovative implementation of e-health technology?

- 8%** A. Yes, I think we lead other states
- 39%** B. Yes, we've implemented some e-health technology, but we have a way to go
- 14%** C. No, we will implement e-health technology but after the other states
- 33%** D. No, we do not have an innovative implementation of e-health technology
- 7%** E. We're going to work on that right after we hit the beach

Medicaid costs are steadily rising and will continue to increase for state budgets. Do you think HIT should play a role in Medicaid reform?

- 46%** A. Yes, HIT could have a significant impact on Medicaid reform
- 31%** B. Yes, but I'm not sure to what extent
- 11%** C. No, HIT standards are too vague right now and Medicaid reform is too dire to wait for them to be defined
- 12%** D. Unsure at this time

Do you think that reimbursement for Medicaid providers to implement various forms of e-health technology such as electronic health records, or e-prescribing, would be an effective means for implementing technological innovations?

65% A. Yes, reimbursement would provide a necessary incentive to providers

25% B. Possibly

7% C. No, provider reimbursement is not a feasible option

1% D. Not sure

2% E. Seriously, about that beach...
