

28. (State government only) Should a CIO be concerned about e-discovery?

4%

A. No, all records are the responsibility of other departments in my state.

84%

B. Yes, electronic records in systems supported by the CIO may be subject to discovery requests.

12%

C. No, my state is never involved in a lawsuit.

29. Spending on e-discovery technologies is predicted to reach what level by 2011?

1% A. \$ 174.6 million

13% B. \$ 500.4 million

60% C. \$ 2.7 billion

26% D. \$ 4.8 billion

30. Where should public records be stored?

- 0% A. Always make printed copies of any record and store them in metal cabinets
- 13% B. Run back ups of all records and send them to an off-site storage center
- 73% C. Follow the records retention schedule to determine the appropriate method of storage
- 2% D. Why worry about storage when you have a good search engine?
- 11% E. Put them where the newspaper reporters can't find them

31. True or False: The average life of a Web site is six months.

28% A. True

72% B. False

Answer: False. Hard to believe, but the average life of a Web site is between 44 and 100 days. The Web has revolutionized communications, making it possible for virtually anyone to become a publisher. Yet much of the material from the early days of the Web has vanished.
